

**Evancom® 2011 Executive & Management Seminar Sessions – Overviews**  
*Toronto – Hamilton – Niagara Region*

**"Acceptable Use Policy Development & Company Internet Use Management"**

*A Presentation by Peter E. Evanetz, Evancom® ... "Facilitating Business & Technological Development Since 1986"*

Use and abuse of business hi-tech resources by management & staff can cause serious problems for companies. With the expansion of business communications beyond the traditional wired computer network into things like the use of wireless laptops, cell phones, P.D.A.s, and virtual private networks for employees working from home (whew! just to name a few!), business management needs to become even more vigilant with the use and management of company communication and portable storage devices. The establishment, communication and use of an "Acceptable Use Policy" can help to avoid problems which arise from the intentional or unintentional misuse of company communication equipment, and the damages and costs misuse brings on.

The full four session seminar series for 2011/2012 covers four general areas.

- \* Recognizing & Understanding Potential Problems
- \* Reviews and Audits - Risk/Rewards
- \* Policy Development
- \* Policy Implementation & Management

2011 dates, locations and registration fees to be announced.

**"Expect the Unexpected - Emergency Preparedness, Reviews and Audits."**

*A Presentation by Peter E. Evanetz, Evancom® ... "Facilitating Business & Technological Development Since 1986"*

Disaster recovery and a business continuity challenge is one thing no businessperson ever wants to experience. By having staff and management recognize potential disasters that can disrupt your business and having a plan on how they would deal with it, management and staff can help mitigate the damages of an unexpected disaster and reduce the associated stress, business disruption, downtime and business loss.

2011 dates, locations and registration fees to be announced.
